FEDERAL CONTRACTING + MISSION DELIVERY

The Boulevard Consulting Group, LLC
DBA BoulevardLabs

Capability Statement

Where people, data, and technology converge to move the mission forward.

BoulevardLabs helps government and mission-driven organizations turn complex technology, operational, and workforce challenges into capabilities people can actually use, through outcome-focused projects, purpose-built products, and specialized talent.

CORE CAPABILITIES

Data & Analytics
Forecasting, dashboards, and decision support that turn raw data into clear action.

AI & Machine Learning
Practical AI adoption, predictive models, and AI-enabled workflows, built responsibly.

Software & Product Engineering
Secure, user-centered applications, from rapid prototype to deployed product.

Cloud & Cybersecurity
Cloud modernization and data systems rooted in security, compliance, and integrity.

Acquisition & Financial Management
Spend analysis, contract oversight, and financial risk management.

Program & Project Management
Disciplined delivery, process improvement, and performance reporting.

Education & Workforce Development
AI literacy, training, and workshops that prepare people to work alongside new technology.

HOW WE DELIVER

Outcome projects · Products · Talent

PRODUCTS + TOOLS

Purpose-built tools that support the mission without defining it.

RAM
RELIABILITY ANALYTICS

Models system reliability to inform sustainment and readiness decisions.

SmarTraq
SPEND INTELLIGENCE

Tracks expenditures, flags irregularities, and surfaces efficiencies.

OPAL
ANALYTICS + VISUALIZATION

ML-driven dashboards, trend analysis, and predictive forecasting.

ECHO
TRANSCRIPTION

AI transcription and translation into searchable, export-ready content.

WHY BOULEVARDLABS

Human-centered adoption
Technology only creates value when people can understand, trust, and use it.

Strategy through execution
Strategy, technology, talent, and training connected, not siloed.

Mission experience
Proven in complex federal and defense environments.

Practical AI
Usable, responsible AI with measurable improvement.

Flexible ways to engage
Multiple contracting and partnership pathways.

Secure + compliant
Security and compliance built into how we work.

CASE STUDIES

U.S. ARMY

Predictive Sustainment & Repair Planning

Consolidated operational, maintenance, financial, logistics, and contractor data from multiple sources into an integrated analytics environment for sustainment and repair oversight. Machine-learning models supported repair forecasting, classification, predictive analysis, and program decision making. Models drew on up to 12 source databases and achieved ~1.5% repair-cost forecast error.

35%

LESS PLANNING & LOGISTICS TIME

U.S. NAVY

Financial & Program Oversight | SmarTraq

Transformed fragmented financial and program-management processes into a more integrated analytical environment using SmarTraq. The capability supports data validation, Navy ERP integration, financial visualization, forecasting, risk identification, and program oversight. It earned a DoD Certificate-to-Field, replaced a manual, Access-based process, and led to a $4.5M, five-year sole-source follow-on with no corrective actions.

<90 days

TO A DOD CERTIFICATE-TO-FIELD

U.S. MARINE CORPS

Logistics Portfolio & Modernization

Supported Marine Corps logistics modernization through IT portfolio analysis, cloud migration planning, and data-driven decision support. Helped translate complex systems data into actionable insights for strategic planning, resource allocation, and mission readiness.

LOGISTICS IT SYSTEMS ASSESSED

U.S. DEPT. OF JUSTICE

AI Transcription & Media Analysis | Echo

Deployed Echo to transform recorded conversations and media into structured, searchable information using AI-enabled transcription, translation, speaker identification, diarization, timestamps, captions, and analytical review while maintaining human oversight. Defensible, immutable exports support downstream legal and investigative review.
